[POSTED BY SOMEONE OTHER THAN PAUL]

Paul Mampilly knows his way around stocks.

As a money manager on Wall Street, his hedge fund was named “one of the world’s best” by Barron’s. Take a look at his recent stock gains and you can see why.

He gained a mind-blowing 634% on Netflix...

279% on Facebook...

327% on Olympus...

298% on Whole Foods...

And his top stock pick for last year, Foundation Medicine, rocketed 585%.

Now he’s sharing his No. 1 pick for 2019, and he thinks it could make more profit than some of these past picks ... *combined*.

Rick from Illinois just wrote me this note.

*“Paul, just want to give you a great big thank you for your insights on your stock picks. I made a windfall of \$102,000 on FMI alone!”*

FMI (Foundation Medicine) was my No. 1 stock pick in 2018. It shot up 585%.

Now I’m announcing my No. 1 pick for 2019, and this one could explode even higher...

### **My Top Stock Pick for 2019 is...**

Before I retired from Wall Street, Kiplinger named my hedge fund one of the top 1%. After years of working with the world’s richest, I’ve shifted to helping Main Street Americans get great returns on their investments. Find out about my No. 1 stock pick for 2019.

These look like typical, run-of-the mill warehouses...

They could be anywhere. They could contain anything.

Yet these plain, drab buildings actually hold the key to our future.

The technology inside has the power to transform every major industry including health care, banking, insurance, real estate, logistics...

Spending on this technology is expected to balloon from \$4 billion to \$3.1 trillion. That's an increase of 77,400%.

And one company stands at the forefront of this technology. Its stock is dirt cheap right now. But I expect it to soar ... making it my No. 1 pick for 2019.

### **The No. 1 Stock to Own in 2019**

After growing my hedge fund into one of Kiplinger's top 25, I retired from Wall Street at age 42. Now I'm helping ordinary Americans find great investment opportunities. Find out about my top stock pick for 2019 and why I think it's going to surge this year.

## FULL LENGTH SQUEEZE/ARTICLE

A lot of people are going to be surprised at this one.

I know they were surprised by my top 2018 stock pick, Foundation Medicine. After all, the stock sat for years. But I knew something they didn't ... that the company was primed for a buyout.

Sure enough, on June 19, 2018, Swiss pharmaceutical giant Roche bought the company. Shares soared 585%.

My subscribers excitedly shared their returns with me. Mike reeled in a whopping \$1,109,307 from this stock alone. Laura and Frankie instantly profited \$160,000. Chris made more than \$58,000. And modest investors saw huge gains too – like Lenny, who turned his \$1,000 investment into \$3,000.

Now, my No. 1 pick for this year is in a completely different market.

The technology it's developing will impact every single industry on the planet. Fortune says it will "change the world."

Billionaire investor Marc Andreessen calls it "the most important technology since the internet itself."

Industry experts say spending on this technology will shoot from \$4 billion to \$3.1 trillion. That's a 77,400% increase.

Imagine taking a \$10 dollar bill and watching it multiply into \$7,740 with zero effort...

That's the potential of this market.

As for my No. 1 stock for 2019 – like most of my favorite picks, it's underrated.

It's still one of the cheapest stocks on the S&P 500. It's down more than 40% from a recent high. And with a PE ratio of 3.15, it looks like it's severely undervalued.

This stock is an absolute bargain right now. But it won't be for long...

If you're a bold investor who's tired of the usual financial advice, you'll love hearing about my No. 1 stock pick this year.
